Messrs Parker Garrett,
Dear Sirs,

Do what thou wilt shall be the whole of the Law.

Yours of 28 January.

I have not yet been accused of anything whatever, and am therefore not in a position to defend myself either to your satisfaction or that of anyone else.

My friends have told me for some time that you have been deliberately disloyal to me throughout. Your arguments to the same effect are beginning to convince me.

I will send my representative to see you shortly, when I hope you will be able to justify yourself against the accusations of breach of professional faith which circumstances unfortunately have caused me to utter.

Love is the law, love under will.

Your note filled me with great joy. Thou art

Sorry my notes arrived too late but they may
prove useful for subsequent work of the workshop

I shall be del^{ighted} to hear of $\frac{1}{2}$ or $\frac{1}{5}$ as a gift
if, or I assume, you have furnished it with photos &
sketches I may be able to elucidate some of the many points.
My inf^{erence} about the West Face is that the desc^{ensions} are
very ^{prominent} because it is very. Once one leaves
driving land and like ^{pulls} out the slabs & points
the E.g. lay. breaks down ~~some~~ back. I sh^d must be
to have the desc^{ensions} of Mallory's climb. Was he perhaps
like myself led into it by ^{long} himself in the face & so
is not this a strong ^{presumption} of an Oread with
exc. taste in young men but a peculiar sense of humor.
Kelly's 3 climbs decided^{ly} puzzled me. Of c^{ourse} the intended
& I presume ^{problem} at least, as to what a route is.
I also find it v. misleading to use words like "harder".
I sh^d have said eg. that the N climb was not hard at all
save for the single bad spot. It all depends so much on
man's physical characteristics.

E.g. Eck^{stein}, provided he could get 3 fingers

on something that could be described as a ledge by a man
far advanced in his kind would be such a pipe or
the aforesaid ledge a few ^{inches} later & some of us could
tell how he had done it; whereas I, totally uncap^{able} of
the mild int^{erpretation} of facts, used to be able to get up all sorts of
phases that Eck^{stein} could not attempt. Now I have even
seen Mallory but I would not quite admit that he
resembles me & v. much more than he does Eck^{stein}. Thus.
sort of desc^{ensions} (as opposed to the point ^{particular} ascent which I be-

I am rendered quite helpless. If I had 10000 francs next week I could
put things in quite decent order in a v. few days I feel sure.

I told you already how strange were the almost daily incidents that
baffle the most promising plans in the most unaccountable manner. I will
quote just 2 incidents.

1. Asking money is called to Tunis on Jan 10. Neither our driver
nor the sender (apparently) can get any info. whatever as to what
has happened to the cash. We cannot even get a reply to urgent letters.
A telegram also lives close to London & is a friend of some 20 yrs
standing.

Inc 2. An old friend turns up, unexp., about 3 w. ago manifest the utmost
sympathy & goodwill, lends me some money to go on with my book, does
not move & leaves Paris saying he will return in a fortnight &
gives me an address to write to. (He is connected with this G. bank of
which I write. He is my Pandarus with the G. Bank. I have not
returned. We get no answer to 4 letters & 2 telegrams. One letter is
returned by the P.O. Of the rest we have no news.

Really I can't help feeling sometimes that I have got into a
world where the laws of cause & effect no longer obtain. It is of a sort to
try up my patience of exp. for any one invidiously the kind. But other
the same lack of rationality applies to all of them the laws prob. gives
another a similar laugh & declares further reforms in the matter.

(William Seabrook.)

Dear Bill

55

Lots of talk about you here

Question is - have you played

straight hand?

You must have made a very great
deal of money in the serial; and

you ^{must pay} ~~owe~~ me 50%.

You said "Trust me", & I trusted you
I haven't had a cent from you but the

\$50 necessary to ^{collect &} mail you the material.

[You have not returned it either
do so at once.]

Now I'm a pretty stark man about cash
 but I've been driven to desperation, &
 it's time you realized that I'm not
 entirely an Easy Mark, and also
 that my artillery has been renewed &
 enlarged with some remarkably heavy
 metal.

In point of fact, I have come here
 under an oath to put all other
 work aside until I have got
 square all round.

Now then, that means this.
 You will cable me within 24
 hours of the receipt of this

1. In December 1919, D^r B, one of the best consulting physicians in Harley Street, who had known Mr. A all his life, prescribed heroin to stop spasms of asthma. (Mr. A is himself a theoretical chemist, and a well-known writer on narcotic drugs etc. Cambridge University and King's College Hospital, London.)
2. Mr. A went on with this treatment, when necessary, till ~~the~~ January 1924 when he ran short of heroin. When the next attack developed in Paris, he called in D^r C. who immediately prescribed pure heroin in powder — 4 centigrams. The chemist filled the prescription without a word.
3. D^r C also had to prescribe Ether for inhalation in case of very acute crises, but was so scared that he wrote on the prescription that it was to be used for washing out a wound, and asked his patient to get the two prescriptions made up by different chemists.
4. D^r C. has degrees from Johns Hopkins University and Paris. His evident incompetence, dishonesty, and moral cowardice disgusted Mr. A.
5. This reminded Mr. A. that he knew a doctor of high reputation, D^r D., to whom he appealed. D^r D. however being only a surgeon, could do no more than recommend D^r E, a famous physician of wide experience and deserved eminence.

6. Part of Mr. A's trouble had been that the good action of the heroin on him seemed to have deteriorated somewhat, and he had put this down — wrongly, as will now appear — to the effects of toleration. D^r E. examined Mr. A. thoroughly on Feb. He found however no symptoms of intoxication, diagnosed mechanical obstruction in the nostrils, and sent Mr. A. to D^r F. In the meantime he prescribed alternatives for the heroin and for several other quite useless prescriptions of previous physicians of an amateur type.

These however proved quite useless as far as cutting short acute attacks was concerned; and, on Feb. 8, D^r F. unhesitatingly prescribed heroin.

Mr. A. discussed with him at some length the existing laws about drugs. D^r E. agreed that they were ridiculous and an insult to the medical profession. His main point (for the purposes of this report) was that he doubted if any chemist could be found in Paris who would make up a prescription of pure heroin to be used at discretion through the nostrils, and so ordered pills containing an admixture of confounding inert drugs.

7. D^r G. F. confirmed D^r E's diagnosis on examination, and removed a large quantity of bone from the left nostril on Feb. 7, the right nostril to be similarly treated on Feb. 16. The first operation was before D^r E's prescription of the pills, and D^r E. was inaccessible at that hour. Accordingly D^r F. prescribed heroin, this time in the form of a potion with the addition of two harmless and pleasant ingredients. The prescription was not only made up without hesitation, but was not retained by the pharmacist. It was merely marked with a figure in light ink which might have been erased with the greatest ease if desired.

8. Mr. A, reporting to D^r E, obtained the prescription for pills aforesaid, the object being to keep him from discomfort until the success of D^r F's operations had had a chance to remove the original cause of the trouble. The first chemist to whom this prescription was submitted refused to make it up, asserting that the law required that the pharmacist and the patient should live in the same district. An apparent confirmation of this statement came from the fact that a chemist in Mr. A's district made no difficulty.
9. On the contrary this statement is refuted by
- a) D^r E's statement that the chemist was talking rubbish, and that no such law exists.
 - b) the fact that D^r C's prescriptions had been made up in a district far distant from the residence of Mr. A, and without any inquiry on this or any other point.
10. The name and address of the patient have not been written on any but one of the many prescriptions which form the subject of this report.
11. A well-known English chemist informed Mr. A that a prescription containing any of the class of drugs in question must be signed by a doctor with French qualifications, and resident within five miles of the town where the prescription was made up. As against this we have the fact that D^r E's repetition of the prescription for pills was made up without hesitation in a town sixty kilometres from Paris.

12. Mr. A, to convalesce from his little operation, had gone to this distant town for fresh air and exercise; but immediately on his return to Paris on Feb. 11 was stricken by an asthmatic attack of extreme severity, to combat which he had to take seven of the pills instead of one, as well as copious inhalations of ether, before getting, many hours later, any relief of his agony. This produced most unpleasant symptoms of narcotisation, a semi-sleepless night, and a bad headache in the morning. The point is that according to all his experience during three years, a fifth of this quantity of heroin if taken in pure form through the nostrils would have stopped the attack instantly and left no bad effects.

13. The above being reported to D^r E, by telephone, he asked D^r G to call on Mr A and administer a hypodermic injection of heroin. When D^r G called, Mr A was in no need of the drug and refused the injection, but repeated his request for a supply of the pure powder to be used in the event of another attack. Mr. A has a strong objection to intoxication of any kind; and hypodermic injections acting directly on the blood are certain to produce this effect at a maximum, whereas Mr A on the contrary wants to secure local action on the recalcitrant tumours without any general narcotisation. He explained this very thoroughly to D^r G. who was entirely sympathetic but was afraid to prescribe the required pure drug and insisted on diluting it with twenty times its weight of bi-mell and lactose.

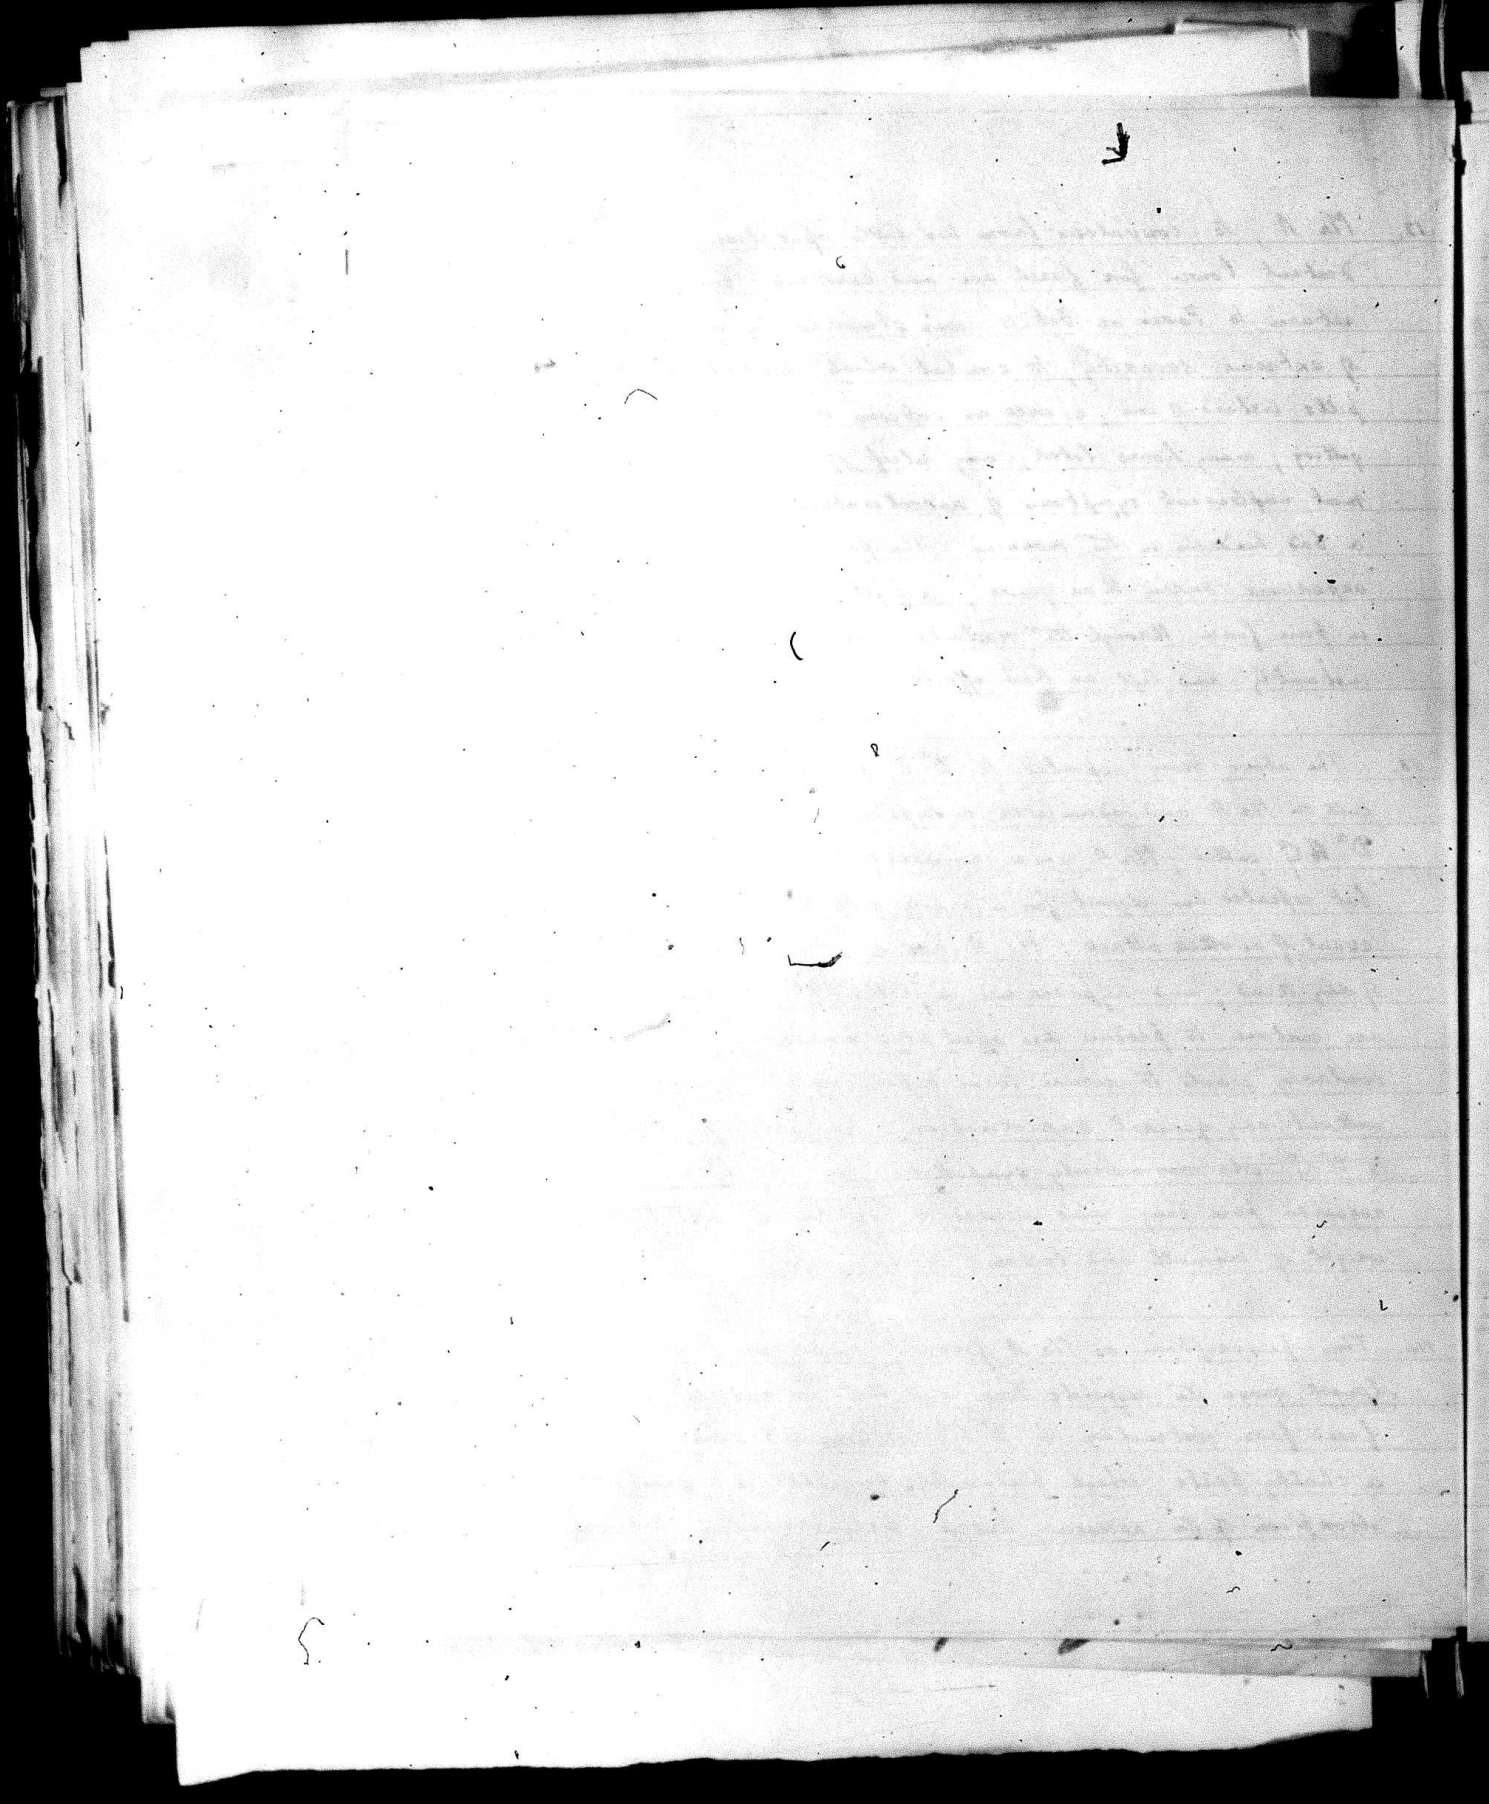

14. This prescription as Mr A foresaw simply meant that he could no longer gauge the requisite dose, and that his nostrils, so conscientiously freed from obstruction by D^r F's scissor and snare, were clogged by a chalky paste, which presumably prevented, to a great extent, the absorption of the necessary heroin besides causing discomfort and mess.

15. D^r G, apprised that his patient's forecast had proved correct, said that he would do his utmost to procure the pure drug. Later in the day he reported his failure though informed that D^r C's prescription for it had been made up without difficulty.
16. D^r G, apparently thrown off his mental balance by the terrific circumstances of the case, hastily sent round a prescription containing no heroin, but whose principal ingredient was cocaine.
17. Mr. A. boiled over. He can only conclude from the above facts that not even the most eminent doctors and druggists are acquainted with the ramifications of the law, and that they are for the most part afraid in consequence to prescribe according to their oath and conscience; while in the case of the pharmacists we are faced with the absurd position that a complete stranger to the patient arrogates to himself the right of criticising the judgment of the physician in charge of the case.
18. It is clear from the above that if Mr. A. wants H as such he can get all he wants, every one of the seven doctors having prescribed it, and that all he need do is to have the drug separated and recrystallised. He can also get it by the ounce in any one of a hundred underhand ways. His trouble is that he objects to be narcotised on to do anything dishonourable.

We have thought it worth while to collect and set in order these facts in order to exhibit with the utmost thoroughness one small angle of the scandalous and humiliating situation created by the drug-law as it stands. It is to be noted that in countries where cocaine and similar drugs are sold freely there is no drug problem, any more than there is an absolute scandal in England where it can be bought as easily as any other form of spirituous liquor.

We have thought it worth while to collect and set in order these facts in order to exhibit with the utmost thoroughness one small angle of the scandalous and humiliating situation created by the drug-law as it stands. It is to be noted that in countries where cocaine and similar drugs are sold freely there is no drug problem, any more than there is an absolute scandal in England where it can be bought as easily as any other form of spirituous liquor.

My dear Bentall, (C. Harris)

When I called this afternoon the spirit of Ultratism, Progress, Christianity, and all those nice things flamed up in me so fearfully that I quite forgot one important proposal.

I am admittedly knowledgeable beyond the common in matters such as are discussed in the synopsis here with enclosed. I can promise you six fulminating articles. The matter will not stop with their publication. The present state of the law in England, France, America, Italy, is an outrage on decency and common sense.

Here is an instance. A French doctor, with a Johns Hopkins diploma, is actually so afraid of the law that, finding it necessary to prescribe Ether to pull a patient through a crisis of dyspnoea he writes the prescription that the Ether is to be used for washing a wound. I do not think that any consent is needed; and I am sure you will agree with me that a series of articles exposing the extraordinarily scandalous conditions obtaining at present should create a perfectly delightful rumour, and incidentally help to relieve many unfortunate sufferers to whom life is only tolerable on condition of palliative treatment with forbidden drugs.

I may point out that perfectly healthy people who use these drugs for vicious purposes have no other difficulty in obtaining them than is involved in paying high prices to illicit traffickers, as is notorious. The law achieves precisely the opposite of its intended effect.

P.S. I hope your absence from the office yesterday does not imply ill-health.

Dear —

(I am in honest doubt, which is worth half the creeds, as to what was to employ).

Yours of Jan. 31. reached me at a moment when I have another doubt, whether I am losing my mind, being initiated, or entering second childhood. The stimulus of your letter helped to synthesize (the analysed) thoughts in question.

I adore you for your mysteriousness. What is the "Bermondsey Book"? The Bridgewater Book in Browning is the nearest I can get to it, and that is ~~the nearest~~ ^{over 200 miles away} I can get to it. I am not an American professor to shoot a rocket at the moon.

I think you are a little unkind to Helen. It suggests that you cannot have fucked her, or alternatively that time has dealt ^{with her} more unkindly than any conceivable man.

About your coming to Paris. You don't really tell me anything definite. Are you an okapi or an armadillo? Your address is a mere convict indication.

I regret the moribund condition of the T.S., my twin. Being a healthy animal, I can save her, if we can only undo the operation which divided us. If someone would get up and show these bric-a-brac without a shephard that I have a crook and am not one, contrary to their previous experience, a really great movement might yet thrive. I stand for H.P.B.'s original principles, p-a-t pat. My Irish blood is at now in free of extra expense; but at the same time give me liberty or give me death.

Thanks for the ^{prescription} pills which arrived in my time. I had not finished the other pills & have at present 10 left of the 36. The facts however that, as I rather expected, they are not quite as good as the pure powder. They act more slowly & less efficiently. The other ^{effects} works like a conjury trick. There is also a certain definitely narcotic reaction as unpleasant as undesirable which is not the case when taken like the rose. By the latter method I succeed get rid of a fair proportion of the dose and also a certain quantity cures with the smegma & is thus not an irritant. Hence no general reaction. Nothing but the swift stimulus & relief without any trace of general intoxication.

I have been taking the cachets very conscientiously & am so that the improvement is marked. The attacks seem less frequent & very much less distressing, espec. since my left nostril is clear. of the "corp" is sent. as a word of grace for which I have to thank you. I can say
about it a dear word. that I feel I have kept it and to you. There is
no place in the world to-day where you are not found. filled to the top; and you are still
a young woman.

The Eng. of all this is "Persuasion" which is the best of the best of the best

I hope this letter will not depress you. But you have asked me to refrain from putting the best face on things too much; and you can at least be sure that I'm not painting things needlessly black.

15th 9 P.M. now. I'll keep this open till A.M. in case of a letter from you, & to report latest news -

Your 'warning' letter caused a rather serious relapse. I must admit to being the prey of anxiety; all round, and especially as to the threatened shortage of me, which might lead to a worse physical collapse than you saw while you were here.

It seems that feeding up on it gives strength, but it starts asthma, bronchitis, & so until I have accumulated a surplus sufficient to calm the condition from above, just as physical prostitution calms it from below.

The above may be taken as definite; and I doubt whether at present, & in these actual conditions, I have enough reserves of strength to pull through the crisis of complete abstinence, as I could do almost without noticing it if I were being properly tended.

This also is important. Your 'ghoulsh' letter affected me so seriously that I almost decided to ask you to communicate only through Estlin, relying on his judgment to write nothing that could knock me down again. But I think it may be settled this way - provided that you understand how critical ill I am, as regards resistance to bad news or gloomy forebodings. I have had real doubts as to how ^{far} my reason is to be trusted to stand it sometimes.

and this is the formula. Let me know nothing at all about the past. Treat me as the new-born babe I am - to be nourished and prepared to be the learned and Cynical, Christ. Write therefore nothing at all except plans and hopes for the future. I understand my ordeals to this point, that my rebirth must be complete, with no faint of inherited syphilis from A.C.!

I hope strongly that you will be able to arrange for my leaving here before next Monday. The monotony, solitude, absence of running, &c, and working steadily and deadily

mischievous. My spirit is infinitely purer and stronger than it has ever been in my life; but my flesh is shockingly weak. E.g. I am trying to sell the serial rights of McKay to the Chicago Tribune. Their man saw me yesterday for some two hours, & I gave him a synopsis 75-304 (canis nothing) Frank, but it frustrated me: I have had to stay in bed all day. I am far too weak to help myself, save in such ways as above, and writing at odd times. (Am preparing another essay, Personal, on Sturges's ideas about disguise. Have collected material, but have not yet enough strength to write it out)

It is therefore utterly useless to load my mind with care about others. This is not heartless: the best way I can help is to give me the chance to pull my health up; and the absolutely essential conditions are as above (1) No thoughts of the past, or personal affairs at all: only constructive work for the future

Two letters have come in from you; but I cannot

It would be stupid to risk being knocked out
for no purpose - for there is nothing I can do.

Let me just receive a P.C. saying that you will

so via Bernard Harrison, let Jane make packets.)

It is unbecoming to treat me as a quite

tended, and on no account frightened or hurt.

I am sorry to have to take so abject a
view of the phrase "masterly inactivity"; but your
'ghoul' letter really caused so serious a relapse

Your 'ghost' letter was certainly a masterpiece of misleading!

A bombshell burst aside me from another disaster this morning: so I said: well, I can't get more blown up, so I'll open the fatal letter.

Nothing in it but the most splendid encouragement! Iried, after due consideration: opened letters:

apologize: agree: will leave for London directly

Incidentally, it is most urgent - to avoid a stupid possible snag - that I leave not later than Sunday next.

Typical of the self-contradictory nature of the
 Ruach.

I want to find a couple of rooms in some
 quiet but airy street or square. The best floor
 flat at 31 Wellington Square would do, and it is
 good to be with people that know me. One does not
 want trouble with landlords, as I have had.
 It might be possible to find a studio to let

 looked after rather carefully & here, too, the
 question arises. Withdrawal means starting
 asthma until one is too weak to cough; but I
 can doubtless pull through that - there being no

At least, I suspect a nasty trap for me if

I've considered your letter about 'amuse-

My trouble has been that I have weakened under
the constant abuse of my generosity & friend-
ship. So now when a man comes along with
a smooth tale of being my best friend, & doing
me a good turn etc and then makes a lot
of money out of doing me dirt, I can only
say with Browning:
